PROFILE

I am a final-year Data Science undergraduate with a strong interest in Data Analysis, Data Science, Artificial Intelligence, and Machine Learning. Through academic projects and practical work, I have gained hands-on experience with Python, Java, Flutter and machine learning techniques. I enjoy working with data, finding meaningful patterns, and using technology to solve real-world problems. I am a quick learner who enjoys working with data and continuously developing my technical skills. I am now looking for opportunities to apply my knowledge, gain industry experience, and contribute to data science and AI projects.

EDUCATION

2023 - PRESENT	BSc.(Hons) in Data Science Sri Lanka Technology Campus Current GPA 3.69
2020 - 2022	G.C.E. Advanced Level - Index (2649179) Taxila Central College - Horana Physical Science Stream (Chemistry - C, Combined Mathematics - S, Physics - S)
2014- 2019	G.C.E. Ordinary Level - Index (91235146) Royal College - Horana

TECHNICAL SKILLS

Programming Languages Python, Java, C	Frameworks & Technologies Flask, Flutter	Office Tools Microsoft Word, Microsoft Excel, Microsoft PowerPoint
UI/UX Design Figma	Version Control Git, GitHub, DagsHub	Tools & Platforms Google Colab, Jupyter Notebook, Apache Spark, Apache Hadoop, Apache Airflow, Docker, MLflow,TensorFlow
Web Development HTML, CSS, JavaScript	Databases MySQL, MongoDB, PostgreSQL	
Development Tools Visual Studio Code		

SOFT SKILLS

- Teamwork
- Leadership
- Communication
- Time Management
- Critical Thinking
- Problem-Solving

PROJECTS

2026 - PRESENT	Liyaa: AI-Powered Postpartum Depression Detection & Recovery App Final Year Project, SLTC Research University Proposed an Explainable AI system to predict postpartum depression risk among Sri Lankan mothers and explain its predictions in plain language. The planned system includes a conversational chatbot for emotional check-ins, personalized recovery recommendations, and continuous mental health monitoring. Tech : Python, TensorFlow/Scikit-learn, SHAP, Flutter, Supabase, Dialogflow CX
-----------------------	--

2025	SignFy: Hand Sign Detection App: UX/UI Design (Group Project) Figma prototype for a hand sign recognition app that helps people with hearing or speech impairments communicate with others in real time. Designed the interface for sign-to-text/voice translation, voice command controls, and multi-language support, aimed at use in classrooms, workplaces, and public spaces. Tech : Figma
2025	CinemaVerse: Online Movie Ticket Booking System (Group Project) Built a full movie ticket booking platform with seat selection, secure online payments, and an admin dashboard for managing showtimes. Delivered the project on a strict 6-week schedule using Agile project management. https://github.com/Jayanisashikala/Online-Movie-Ticket-Booking-System Tech : HTML,CSS,JavaScript, Python, MySQL, Marco
2025	WiSec: Intelligent Wi-Fi Security Vulnerability Scanner (Group Project) Built a web app that scans nearby Wi-Fi networks and uses machine learning to detect weak security settings, such as outdated encryption and default passwords. The app shows a real-time dashboard with a security score and simple steps to fix any risks found. Tech : Python, Scapy, TensorFlow/Scikit-learn, Flask, SQLite, HTML/CSS/JavaScript
2025	End-to-End Customer Churn Prediction with Full MLOps Pipeline (Group) Built a complete machine learning pipeline to predict customer churn, from data cleaning to deployment. Set up experiment tracking, automated the entire pipeline, and deployed the final model as a live API inside a Docker container. https://dagshub.com/Jayanisashikala/MLOps_Churn_Project Tech : MLflow, DVC, Apache Airflow, FastAPI, Docker, Scikit-learn, XGBoost
2025	Coffee Shop Sales Analysis (Business Intelligence Case Study) (Individual) Analyzed a coffee shop sales dataset to find what drives revenue. Cleaned messy data, tested key business assumptions, and built a model to predict sales. Presented the results in an interactive Power BI dashboard. https://github.com/Jayanisashikala/coffee-shop-sales-analysis Tech : Python, Power BI, Scikit-learn, Pandas
2025	Contact Address Book: Dockerized Flask Web App(Individual) Built a containerized contact management web application with persistent data storage. Users can add, view, edit, delete, and search contacts through a responsive interface. Used Docker Compose to orchestrate a Flask app container. https://github.com/Jayanisashikala/CIT-23-02-0162 Tech : Python (Flask), PostgreSQL, Docker, Docker Compose, HTML5, Bootstrap 5

CERTIFICATES

First Runner-Up, InspiHER{Tech} V4.0 (2026)

IEEE WIE Student Branch Affinity Group, SLTC

Secured 1st Runner-Up as part of Team NovaSquad, advancing through HackNova, MLArena and QuantumQuest rounds to the final.

Certificate of Participation, Bio Fusion Hackathon(2026)

IEEE EMBS Student Chapter, University of Sri Jayewardenepura

Participated in a hackathon focused on innovation in biomedical engineering.

Certificate of Appreciation, Emerging Scholars' Research Programme - Certificate Phase (2025)

Faculty of Postgraduate Studies & Research, SLTC

Completed the certificate phase in recognition of active participation and research commitment.

Certificate in Python for Beginners (2025)

Centre for Open & Distance Learning, University of Moratuwa

Completed an online learning programme in Python fundamentals.

Certificate in Computer Programming (2020)

Ministry of Education

Completed a four-month course covering computer fundamentals, Windows 10, Java programming, and NetBeans.

VOLUNTEERING

Assistant Secretary, ITIA Career Version 1.0 (2026)

ITIA of Sri Lanka Technology Campus

Treasurer, Sipsari Yathra Phase 1 (2025)

Leo Club of Sri Lanka Technology Campus

Coordination Head, InspiHER{Tech} V3.0 (2025)

IEEE WIE Student Branch Affinity Group, Sri Lanka Technology Campus

Member of Content & Caption Creation Team, Gloria 24 Colors Night (2024)

Sports Council of Sri Lanka Technology Campus
